

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. CATALOGUE
OF THE
LINONIAN AND BROTHERS'
LIBRARY,
YALE COLLEGE.

New Haven :

TUTTLE, MOREHOUSE & TAYLOR, PRINTERS.

1873.

THE last printed catalogue of the Linonian Library, in 1860, gives a total of 11300 volumes, and the last Brothers' Library Catalogue, in 1851, 11652 volumes. In 1871, when by a vote of the two Societies, the care of their Libraries was transferred to the College Library Committee, the number had increased to about 13500 each. In the consolidation of the two Libraries, and the rearrangement for the present Catalogue, many useless duplicates and many worn-out and valueless books have been thrown out, and other volumes more appropriate in character to the College Library have been transferred ; so that the present number of volumes is 17000.

Books are generally entered under the name of the *author*, and also under subjects. *Novels* appear under the *first word* of the title (except an article or preposition), as well as under the author.

In consulting the catalogue it should be remembered that when *more than one copy* of a work is in the Library, only one copy is referred to under the title or subject, but all the different copies will be found *under the author's name*.

CATALOGUE

OF THE

LINONIAN AND BROTHERS'

LIBRARY,

YALE COLLEGE.

FIRST SUPPLEMENT.

NEW HAVEN:
TUTTLE, MOREHOUSE & TAYLOR, PRINTERS.
1880.

THIS supplement contains about 5000 volumes added to the library since the printing of the last catalogue in 1873. It has been thought desirable, also, to repeat a few of the entries of that catalogue, in order to give the whole of a series, instead of the continuation simply, and to bring together different editions of the same work.

When a personal name (not fictitious), used as a heading — or the dash representing it, is immediately followed by another such name in *italics*, the latter is to be understood as the name of the author; the former, of the subject treated. When the same name appears both as author and subject, the author entries precede the subject entries.

Novels and anonymous works appear under the first word of the title *not an article*. But title-headings of novels contained in the main catalogue are not repeated in the supplement. Cross-references likewise are only repeated when other references are added.

The library now numbers about 22500 volumes.

ERRATA.

P. 20, l. 19, *for* "Morwenstrow" *read* Morwenstow.

P. 21, l. 22, the entry **Burr** should have place on p. 35.
